Independence

**For some things in life,  
there will never be an app.**

### **The Boxster concept.**

Spending time in the virtual world can be great fun. The only thing is, you can't feel the wind against your skin as you accelerate through every twist and turn. The Boxster celebrates real life. Whether it is known as a design classic, a powerful mid-engined sports car or a pure-bred roadster, it does full justice to its famous predecessors, such as the 356 No. 1 or the 550 Spyder.

We were faced with the question of how it could do so in the future. As ever, the answer was to be found in the harmonious blending of style with functionality and of tradition with innovation. But what is harmony? Something quaint? Something soft and delicate? Not for us.

This is why we have refined our idea of what a roadster should be and honed and sharpened it to give it a completely new expression.

We achieved this with Intelligent Performance. With increased power output at the same time as enhanced efficiency. With innovative technologies and intelligent lightweight construction. With a sporty exterior and interior with aesthetically appealing lines and curves in all the right places.

The spirit of the pure-bred roadster is very much alive and kicking. More independent than ever before, it is even more powerful, visceral and intense.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**Sometimes, spontaneity takes years of work.**

**Design.**

**Exterior.**

We have redefined the Boxster in terms of its performance, and defined how the roadster of the future should look. In doing so, we have once again succeeded in creating an icon of independence. Just like its legendary predecessors, it is a Porsche that continues to epitomise the feeling of genuine freedom and advancement.

The vertical contour of the headlights was inherited from Porsche race cars of the 1960s and 1970s, but while the new Boxster may be infused with the genes of past generations, also it ushers in a new and forward-looking design ethos. It ushers in a new and forward-looking design ethos.

Large, imposing air intakes give the front a powerful appearance.

The side contour promises thrilling performance, while the long wheelbase and low, raked windscreen are integral to forming the stretched, wedge-shaped silhouette. With the hood closed, this impression is reinforced by the extremely sporting

roofline. Large wheels, up to 20 inches in size, make a stylish addition to the classic roadster. These emphasise the car's wide track and help to achieve a completely new level of athletic performance.

The distinctive shoulder line gives further emphasis to the wheels and, in combination with the side air intakes, to the mid-

engine layout. Such features are reminiscent of the 718 RS 60 Spyder, a lightweight mid-engined sports car that achieved success in endurance racing and hillclimbing championships alike.

Precise lines, which run elegantly across the wings to the rear, make the new Boxster unique among Porsche models.

While its overall look is just as imposing, its lines are more sharply defined than on any Porsche we've seen before.

The exclusive door styling reflects more recent Porsche design developments. In typical Porsche fashion, it has a clear function. The dynamic contouring improves airflow to the side air intakes.

At the top, it leads into a precise longitudinal edge and, at the bottom, it is underlined by the sculpted door sill. The exterior mirrors are mounted directly on the doors for impressive aerodynamics and low wind noise.

The rear wing is not only a visual treat, it deploys automatically to reduce lift. Aerodynamics and aesthetics are combined to superb effect. Retracted, the spoiler's edge makes a seamless transition

to the LED taillights. The narrow direction indicators appear to extend the rear wing further. Each taillight sweeps around the central brake light and accentuates the contours of the entire unit. For

striking effect, the reversing light and rear fog light are arranged in the middle underneath the rear wing. Clearly, this lighting concept has no precedent, rather it is the result of Porsche's modern use of form.

The diffuser with stainless-steel tailpipe (dual-tube on the Boxster S) integrated into the centre adds the finishing touch to the powerfully designed rear end.

In summary, the new Boxster draws inspiration from a long history and, yet, it also incorporates the sum of our ideas of how the future should be. In doing so, it reflects a completely new interpretation

of the roadster concept – with a clear focus on looking forward.

**How much independence do we really have?  
It's a question of inner attitude.**

**Design.**

**Interior.**

The interior of the new Boxster models delivers exactly what the exterior promises. Light, uncluttered and defined; everything is conceived with one goal in mind: the perfect drive.

The power, the contouring, the driver's vision, indeed the entire concept, are all drawn in the direction of travel. The intelligent operating concept and the logical arrangement of the controls keep the driver's concentration purely on the road. The elevated centre console cocoons the driver perfectly and reduces the distance from the steering wheel to the gear lever for fast and ergonomic gearshifts. It's just

one of many principles that we've transferred from the racetrack to the road.

The door styling is similarly dynamic. The door pulls mirror the lines of the centre console and blend seamlessly into the distinctive design. The door storage compartments are sweeping and practical.

As you would expect from a sports car, the driver sits low down. Sports seats are fitted as standard. The athletic proportions of the new Boxster models made it possible to introduce a new interior architecture. The result is a feeling of space and light without compromising the authentic roadster experience.

Are you ready to assert your independence? The ignition lock, as ever, is on the left. The three-spoke sports steering wheel falls perfectly to hand. As is typical of a Boxster, there are three circular dashboard instruments. The instrument on the right is now a 4.6-inch TFT screen that shows information from the on-board computer or audio information from the CDR audio system, which is fitted as standard. An inconspicuous shroud shades the instruments for optimum visibility.

The steering wheel rim, gear lever/selector and door pull inlays are finished in tactile leather. Silver-coloured details add to the refined tone; these include the

dashboard trim strip, the side and centre air vent surrounds and the centre console. As an option, the sporty elegance of the new Boxster models can be further enhanced with a comprehensive suite of interior trims and upholsteries.

1 Boxster S with natural leather interior in Carrera Red, SportDesign steering wheel and other optional equipment

## Knowledge should never be confined to books.

### Engineering.

What use is expertise if it isn't put into practice and applied to the road?

In the Boxster, the 2.7-litre horizontally opposed six cylinder engine delivers 195 kW (265 hp); in the Boxster S, the 3.4-litre equivalent generates 232 kW (315 hp). Both mid-mounted engines feature direct fuel injection (DFI) and Vario-Cam Plus for a significant increase in both power output and efficiency. The SPORT button on the centre console is fitted as standard and opens up even more agile responses. Power is transmitted to the wheels by a lightweight six-speed manual gearbox or the optional 7-speed Porsche Doppelkupplung (PDK).

A series of innovative technologies is key to achieving exemplary efficiency. As standard, these include the auto start/stop function, electrical system recuperation, energy-saving electromechanical power steering, intelligent thermal management and, in conjunction with PDK, the coasting function. The result, The result is a significant reduction in fuel consumption and, therefore, a reduction in CO<sub>2</sub> emissions of up to 16% compared with the previous model (depending on the equipment variant).

Porsche Stability Management (PSM) provides stability at the limits of sporty performance. Available as an option,

enhanced Porsche Active Suspension Management (PASM) offers continuous adjustment of damping forces based on the selected mode. Dynamic performance can be further improved with optional Porsche Torque Vectoring (PTV). The optional Sport Chrono Package includes dynamic gearbox mounts for the first time. They contain a fluid with magnetic properties, which enables them to adapt instantly to driving conditions and counteract the effects of inertia. The results are perceptibly more stable handling during performance driving, as well as a higher level of ride comfort.

The brakes at the front axle have a greater surface area for improved braking performance. The Porsche Ceramic Composite Brake (PCCB) is available as an option.

The hood on the new Boxster models makes it easy to clear your head. Fully electric, it opens and closes in around nine seconds and is operable up to a speed of approx. 30 mph (50 km/h).

The intelligent lightweight construction, which uses aluminium for substantial parts of the bodyshell, doors and luggage compartment lids, helps to achieve an excellent power-to-weight ratio.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**Don't think about taking a step back. Unless it gives you a better run-up.**

### **Boxster.**

A roadster is not simply a car. The new Boxster is not simply a roadster. It's a sports car that brings you closer to the road, closer to real life and connects you with your own free spirit.

Its 2.7-litre flat-six engine with direct fuel injection (DFI) and VarioCam Plus produces 195 kW (265 hp) at 6,700 rpm and maximum torque of 280 Nm is

available from 4,500 rpm to 6,500 rpm. The top speed is 164 mph (264 km/h). With the precisely geared six-speed manual gearbox fitted as standard, the Boxster accelerates from 0 to 62 mph (0 to 100 km/h) in just 5.8 seconds. With the optional 7-speed Porsche Doppelkupplung (PDK) and the optional Sport Chrono Package including dynamic gearbox mounts, this time is cut to 5.5 seconds.

Power is transmitted to the road by 18-inch Boxster wheels. Their distinctive five-spoke design affords an unobstructed glimpse of the braking system's black four-piston aluminium monobloc fixed calipers. The optional Porsche Ceramic Composite Brake (PCCB) provides motorsport braking performance.

The slats on the front air intakes are painted in the vehicle's exterior colour. The sound produced by the central tailpipe in brushed stainless steel is unmistakably Porsche.

Lean, muscular and athletic, the car has inherited motorsport genes. They are

characteristic of the Porsche family and are vital to the irresistible appeal of the sports car. They are traits that make the Boxster the sports star among roadsters. Dynamic performance, whether the hood is open or closed, has become synonymous with driving pleasure.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

## Why live life on standby?

### Boxster S.

Life cannot be lived too intensely. Driving should be truly engaging. This is the core message of the new Boxster S.

Producing 232 kW (315 hp) at 6,700 rpm, its 3.4-litre flat-six engine with DFI and VarioCam Plus delivers a mighty 37 kW (50 hp) and 80 Nm more than the engine in the Boxster. Maximum torque of 360 Nm is available from 4.500 rpm to 5.800 rpm.

The sprint from 0 to 62 mph (0 to 100 km/h) is completed in 5.1 seconds and a top speed of 173 mph (279 km/h) can be achieved.

Nevertheless, the dynamic performance of the new Boxster S can be further enhanced. With the optional Porsche Doppelkupplung (PDK) transmission and the optional Sport Chrono Package, the

0 to 62 mph (0 to 100 km/h) acceleration time drops to a mere 4.8 seconds. Optional Porsche Torque Vectoring (PTV) offers increased agility and driving pleasure at the same time as improving traction and handling. The Boxster S delivers excitement at every twist and turn.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

Extra horsepower demands a higher level of safety. The front brake discs are 15 mm larger in diameter than those on the Boxster and the brake calipers are finished in red. 19-inch Boxster S light-alloy wheels with a double-spoke design are fitted as standard and create an exceptionally powerful presence for a roadster.

The slats on the front air intakes are finished in black. The Boxster S comes with Bi-Xenon headlights as standard. The centrally positioned dual-tube twin tailpipe in brushed stainless steel sounds as impressive as it looks.

In the interior of the Boxster S, the door panel armrests and the storage

compartment lid in the centre console are additionally upholstered in leather. The rev counter has an aluminium-coloured dial face.

The Boxster S is an even more vehement interpretation of the classic roadster. It has been engineered to provide an immediate, intense experience. Standby mode is not an option.

**Forward thrust**

**Always mid-engined.  
Never middle ground.**

### **Boxer engines.**

At Porsche, the mid-mounted boxer engine is more than a tradition, it is a legend.

One of the most renowned examples of its use was in the 550 Spyder. In conjunction with an intelligent lightweight construction, this arrangement delivered outstanding agility and cornering dynamics and proved to be a key factor in the countless victories achieved on some of the world's most famous racetracks. In the 1960s, the 718 RS 60 Spyder contributed to the triumphant success of the mid-engined race car with wins in hillclimbing and endurance events.

The mid-mounted engine belongs at Porsche and it belongs in the Boxster. The advantages speak for themselves. The concentration of mass close to the centre of the vehicle and the low centre of gravity produce extraordinary agility and cornering dynamics. At the same time, weight is uniformly distributed between the front and rear axles and handling characteristics are particularly well balanced. The combined result enables the driver fully enjoy every corner and maintain excellent control over the vehicle.

For us, there are many reasons to remain faithful to the mid-mounted engine concept, to keep transferring performance from the racetrack to the road and to continue to combine tradition with innovation. How do we do it? Through Intelligent Performance, our commitment to high power with comparatively low fuel consumption and emission figures.

With this aim, we developed two compact and lightweight boxer engines that are characterised by their ability to deliver high levels of power and efficiency simultaneously. Both engines are equipped

with efficient technologies as standard, including VarioCam Plus, direct fuel injection (DFI), auto start/stop, electrical system recuperation and enhanced thermal management.

What else could we have given the mid-mounted engine? An even more agile response. One press of the SPORT button on the centre console makes engine performance even more dynamic for driving pleasure at the limits of performance. Let's take a look in more detail.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

1

2

3

### 2.7-litre engine.

The Boxster is equipped with a 2.7-litre flat-six engine with direct fuel injection (DFI) and VarioCam Plus. It generates 195 kW (265 hp) at 6,700 rpm. The maximum torque of 280 Nm is available over a broad engine speed range from 4,500 rpm to 6,500 rpm.

The new Boxster with six-speed manual gearbox accelerates from 0 to 62 mph (0 to 100 km/h) in 5.8 seconds and reaches a top speed of 164 mph (264 km/h). With the optional Porsche Doppelkupplung (PDK), it completes the 0 to 62 mph (0 to 100 km/h) sprint

in 5.7 seconds and achieves a maximum speed of 162 mph (262 km/h). In conjunction with PDK the optional Sport Chrono Package, the sprint time is reduced to just 5.5 seconds.

### 3.4-litre engine.

The Boxster S is powered by a 3.4-litre flat-six engine with direct fuel injection (DFI) and VarioCam Plus. It develops 232 kW (315 hp) at 6,700 rpm and the maximum torque of 360 Nm is produced between 4,500 rpm to 5,800 rpm.

The new Boxster S with six-speed manual gearbox races from 0 to 62 mph (0 to 100 km/h) in 5.1 seconds and reaches a top speed of 173 mph (279 km/h). With optional PDK, an acceleration time of 5.0 seconds and a maximum speed of 172 mph (277 km/h) are achieved.

In conjunction with the optional Sport Chrono Package, the Boxster S with PDK finishes the sprint in only 4.8 seconds.

- 1 Power output and torque chart for the Boxster
- 2 Power output and torque chart for the Boxster S
- 3 Engine, gearbox and exhaust system of the Boxster S
- 4 Boxster S engine

4

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**Resonance intake manifold.**

The resonance effect, where the air mass inside the intake manifold is caused to oscillate is used to optimise the induction process at all engine speeds. The engine in the Boxster S is additionally equipped with a switchable resonance valve.

The results are high torque, a flatter torque curve and high power output. The sound produced is characteristically resonant and deep, as you would expect of a Boxster.

**Direct fuel injection (DFI).**

Direct fuel injection (DFI) is featured as standard in both Boxster models. Multi-hole injectors deliver fuel directly into the combustion chamber with millisecond precision. The injection pattern has been optimised for torque, power output, fuel consumption and emissions.

With direct injection, the engine management system regulates injection timing individually for each cylinder, as well as the injection rate for each cylinder bank. This optimises the combustion process and therefore fuel economy. Depending on the engine operating conditions, multiple fuel injections can take place on

each operating cycle. This allows the catalytic converter to reach normal operating temperature sooner after a cold start and a higher maximum torque to be achieved.

DFI improves the internal cooling of the combustion chamber by having the mixture prepared directly in the cylinder. This allows for a higher compression ratio, which helps to deliver higher power output at the same time as enhanced engine efficiency. Injection is regulated by the electronic engine management system and emissions are monitored by the stereo Lambda sensors.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**VarioCam Plus.**

VarioCam Plus is a two-in-one engine concept for adjusting the intake camshafts and switching the lift of the intake valves.

The system first differentiates between driver inputs that typify normal, everyday driving and those inputs that demand maximum performance. The electronic engine management system then imperceptibly adapts valve operation to the prevailing conditions.

This results in instant acceleration and extremely smooth running.

In short, VarioCam Plus provides extraordinary power with comparatively low fuel consumption.

**Integrated dry-sump lubrication.**

Integrated dry-sump lubrication ensures a reliable supply of oil even when a sporty driving style is adopted and the vehicle is experiencing powerful lateral acceleration. It also has additional cooling functions.

The oil tank is located in the engine, thereby eliminating the need for an external oil tank which saves both space and weight.

To reduce power losses and increase efficiency, an electronically controlled oil pump supplies the lubricating points inside the engine as and when required. This results in optimum supply of oil, lower fuel consumption and reduced emissions.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

### Thermal management.

The Boxster models feature a new version of thermal management to reduce friction losses that arise during the warm-up phase.

Thanks to the selective control strategy and on-demand, gradual activation of the various cooling circuits, the engine and gearbox warm up to normal operating temperature more rapidly. The consequent reduction in friction also reduces fuel consumption and CO<sub>2</sub> emissions. During sporty driving, thermal management also acts to reduce temperatures so that a high level of performance is maintained.

Our cross-flow cooling system, as used in motorsport, supplies each engine cylinder uniformly with coolant, which protects the valves against thermal overload and, therefore, premature wear. This improves combustion and keeps emissions, fuel consumption and noise comparatively low.

### Exhaust system.

In the new Boxster models, each cylinder bank has its own stainless-steel exhaust tract. Downstream of their respective rear silencer, the tracts converge into a connecting tube and a single (Boxster) or twin (Boxster S) tailpipe. The stereo Lambda control circuitry controls and

monitors each cylinder bank separately. For each exhaust tract, four corresponding oxygen sensors regulate the composition of the exhaust gas and monitor the performance of the catalytic converters. Having separate tracts means that the exhaust gas can flow more freely. The resulting reduction in pressure loss has a positive impact on power output, torque and the unmistakable engine sound.

Available as an option for the new Boxster models is the sports exhaust system<sup>1)</sup> including sports tailpipe. It produces an even more resonant Porsche sound.

<sup>1)</sup> Not available at launch. Please consult your Centre for availability.

1 Boxster tailpipe  
2 Boxster S twin tailpipe

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

#### Engine management.

The electronic engine management system ensures optimum engine performance at all times. It regulates all engine-related functions and assemblies. The results are optimum power output and torque with comparatively low fuel consumption and emissions.

Another function is the cylinder-specific knock control. Since engine cylinders never all work under exactly the same conditions, the knock control function monitors each one separately. The ignition point is shifted individually, as and when necessary, to protect the cylinders and pistons at high engine speeds and

loads. For compliance with EU Standards, the on-board diagnostics detect any faults and defects that may occur in the exhaust and fuel systems and then notify the driver immediately. This also prevents increased pollutant emissions and unnecessary fuel consumption.

#### SPORT button.

The SPORT button on the centre console is fitted as standard. When selected, Sport mode is activated to provide greater response and enhanced driving pleasure. Throttle response becomes even more direct, the rev-limiter is adjusted to a harder setting and engine

dynamics are tuned for performance driving. The auto start/stop function is also deactivated.

With the optional Porsche Doppelkupplung (PDK) transmission, the shift points are reconfigured to operate

at higher engine speeds. Shift times are reduced and gearshifts become firmer and more immediate, while throttle-blip downshifts are accompanied by an emotive engine sound. Coasting mode (p. 44) is deactivated automatically.

#### Auto start/stop function.

The auto start/stop function, which is integrated as standard in the new Boxster models, switches off the engine when you stop, select neutral and release the clutch pedal. In cars with

Porsche Doppelkupplung (PDK), it is simply a case of applying and holding the brake.

All audio and communication systems remain switched on, as does the air conditioning system.

1 SPORT button  
2 Auto start/stop button

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

The engine will restart as soon as you operate the clutch or, in cars with PDK, release the brake. This fuel-saving innovation is designed primarily for use in towns or congested motorway traffic.

The auto start/stop function can be deactivated and reactivated using a separate button on the centre console. The function may be deactivated automatically under particular circumstances, e.g. in extreme outside temperatures, when the SPORT button is selected or when there is low battery charge.

**Cruise control.**

This optional automatic speed controller for the 19 to 149 mph (30 to 240 km/h) speed range is operated using a switch on a separate control stalk on the steering column. The advantages are clear, not only can cruise control be used as a means of staying within the speed limit, it also helps you to save fuel by maintaining a constant speed.

**Electrical system recuperation.**

For enhanced efficiency the new Boxster models are equipped with intelligent electrical system recuperation. The vehicle battery is recharged by the generator predominantly under braking. Thanks to

this selective recharging, when you request full driving power the maximum possible output can be directed straight to the road.

**Servicing.**

In the Boxster models, the generator and air conditioning system are driven by a single self-adjusting belt. The drive chains on the camshafts do not normally require servicing. With the sole exception of the spark plugs, the ignition system is also maintenance-free in normal servicing. In short, longer service intervals mean longer-lasting driving pleasure.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**Act or relax as you please.**

### Transmission.

#### Six-speed manual gearbox.

The new Boxster models are equipped as standard with a lightweight six-speed manual gearbox. Gearshifts are smooth and optimally adapted to the respective engine map. Shift throws are short and sporty and the gear lever is easy to operate, enabling a rapid gearshift action and providing a truly engaging driving experience. The upshift indicator located in the central circular instrument helps you to maximise fuel efficiency.

The elevated centre console gives you an authentic sports car feel. It positions the gear lever close to the steering wheel,

which enables you to change gear as fast and as ergonomically as possible.

#### Porsche Doppelkupplung (PDK).

Available as an option for the new Boxster models is a completely retuned 7-speed Porsche Doppelkupplung (PDK), featuring both manual and automatic modes. PDK offers extremely fast gear changes with no interruption in the flow of power, improved acceleration over the manual gearbox, very short response times, reduced fuel consumption and a distinct increase in comfort.

In total, PDK has seven forward gears at its disposal. Gears 1 to 6 have a sports ratio

and top speed is reached in 6th gear. The 7th gear ratio is longer and keeps engine speed low to improve ride comfort and reduce fuel consumption at higher speeds.

The design of PDK is similar to two conventional gearboxes in one. The odd numbered gears are housed on one assembly and the even numbered gears on another, each having its own clutch. While one gear is engaged, PDK pre-selects the next gear based on driver input. When the next gear is requested, drive is switched from one clutch to the other in milliseconds, delivering gear changes with no loss of drive.

4

- 1 Gear lever for six-speed manual gearbox
- 2 PDK gear selector
- 3 PDK gearshift switches on multifunction steering wheel
- 4 Porsche Doppelkupplung (PDK)  
Half gearbox 1: gears 1, 3, 5, 7, R  
Half gearbox 2: gears 2, 4, 6

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

With the SPORT button selected, the full advantages of the new version of PDK are brought into play: a more immediate response to throttle inputs, even shorter shift times and swift, throttle-blip downshifts on overrun and when braking – always accompanied by an emotive engine sound.

With the optional Sport Chrono Package, PDK is enhanced by the 'Launch Control' and 'motorsport-derived gearshift strategy' functions (p. 63) for even faster gear changes and the best possible performance thanks to a boost in torque during upshift phases. Overrun downshifts provide extremely sporty braking and acceleration for added excitement.

#### **Coasting.**

The coasting function available with Porsche Doppelkupplung (PDK) enables you to save even more fuel where the situation allows. The engine is decoupled from the transmission to prevent deceleration caused by engine braking. In this way, optimum use is made of the vehicle's momentum, allowing it to coast for longer distances.

For example, you may want to slow down from 60 mph to 40 mph in anticipation of the change of speed limit ahead. As you ease off the accelerator pedal, PDK deselects the current gear automatically and you begin to coast in neutral until you have reached your desired speed. As soon as you operate the accelerator or

brake pedal, PDK re-engages the appropriate gear within fractions of a second. The process is smooth and seamless thanks to the extremely fast clutch.

Another way to reduce fuel consumption is to utilise the coasting function on downhill gradients that are gentle enough for you to maintain a constant speed. Efficient on long journeys, such as on the motorway, PDK remains ready to respond as swiftly and precisely as you would expect.

In short, driving in coasting mode makes a real impact on fuel consumption without any need for compromise on comfort or sporty performance.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**A love of freedom is no reason to lose self-control.**

## **Chassis.**

Even when you want to make a break from everyday life, you should still keep your feet on the ground.

The chassis of the new Boxster models are an excellent match for the powerful engines. Axle components are made predominantly of aluminium. This lightweight material helps to keep the weight of the vehicle and its unsprung masses low, which reduces fuel consumption, improves comfort and increases agility.

The wide track is a prominent feature to provide additional stability and enhanced comfort, the wheelbase has been extended by 60 mm compared with that of the

previous model. The new independent suspension features lightweight spring-strut axles with longitudinal and transverse links and, at the front, cross members that have been refined for optimum control. As a result, each wheel moves precisely to ensure excellent directional stability and superior handling in all situations.

What does this mean for the driver? The sophisticated engineering of the chassis, combined with the mid-engined layout, achieves impressive dynamic performance. Body roll and pitch have been practically eliminated to offer a level of agility that turns each corner into an incomparable experience.

### **Porsche Active Suspension Management (PASM).**

Optional PASM, the electronic damping control system, suits the new Boxster models down to the ground. PASM actively and continuously regulates the damping force for each wheel according to the road conditions and driving style. In addition, the suspension is lowered by 10 mm.

The driver can select between two different modes: 'Normal' which is a blend of performance and comfort, and 'Sport' where the setup is much firmer. Depending on the mode selected,

therefore, PASM can be both sportier and more comfortable than the standard chassis. The PASM control unit evaluates the driving conditions and modifies the damping force on each of the wheels in accordance with the selected mode.

Sensors record the body movements that accompany powerful acceleration, braking or uneven road surfaces. This enables intelligent adaptation of damper stiffness for the selected mode, optimising contact between each individual tyre and the road and reducing pitch.

1

2

In 'Sport' mode, the suspension is set to a harder damper rating. On uneven roads, PASM immediately switches to a softer rating, thereby improving contact between the tyres and the road. When the road surface improves,

PASM automatically reverts to the original, harder rating. If 'Normal' mode is selected and the driver's style becomes more assertive, PASM switches to a harder rating to increase driving stability and road safety.

The results are tangible: increased driving stability, enhanced driving pleasure and improved performance.

**Steering.** One definition of efficiency is a system that works only when it is needed, and then does so in a particularly effective way.

This was the guiding principle for our engineers in the development of the new

electromechanical steering system. Whereas a conventional hydraulically assisted steering system draws engine power continuously, the electric motor in the electromechanical arrangement uses energy only when the steering wheel is actually turned. As a result, fuel consumption is reduced and the absence

of hydraulic fluid eliminates the need for servicing, both of which also have benefits for the environment.

The Boxster concept was designed to offer outstanding cornering performance. The new steering system delivers and it even improves the typical Porsche steering feel.

It features a variable steering ratio and responds precisely and directly as well as providing customary agility, a high level of comfort and plenty of direct feedback from the road. Power steering Plus, the optional speed-sensitive power-steering system, minimises steering effort during manoeuvring and parking.

1 Front axle of the Boxster S  
2 Rear axle of the Boxster S

**Wheels.**

The standard wheels on the new Boxster models have been enlarged by one inch compared with those of the previous models. Made from a lightweight alloy, the larger wheels reinforce the car's imposing presence and further improve sporty performance.

The new Boxster is equipped with 18-inch wheels. Their minimalist five-spoke design is sporty and elegant in equal measure. Tyre sizes are 235/45 ZR 18 and 265/45 ZR 18 at the front and rear respectively.

The Boxster S has 19-inch wheels with a dynamic dual-spoke design. The tyre size at the front is 235/40 ZR 19 and 265/40 ZR 19 at the rear.

The larger rolling circumference improves comfort and performance. At the same

time, the rolling resistance of the new generation of tyres has been reduced which, in turn, helps to reduce fuel consumption.

Wheels up to 20 inches are available as an option.

**Tyre Pressure Monitoring (TPM).**

Optional Tyre Pressure Monitoring (TPM) sends warnings to the on-board computer's display screen in the event of low tyre pressure. The 4.6-inch TFT screen in the instrument cluster enables the driver to check the pressure in all four tyres. The

system updates quickly and accurately after an engine start, tyre pressure correction or wheel change – for increased comfort and safety.

1 18-inch Boxster wheel  
2 19-inch Boxster S wheel

**Brakes.**

Porsche brakes set standards worldwide for stopping power and stability. For the new Boxster models, braking performance is as essential as driving performance.

Both models are equipped with four-piston aluminium monobloc fixed calipers at the front and rear. This design means that, not only are the brakes extremely resistant to deformation, they are lightweight for a particularly fast and sensitive braking response.

The new generation of brake caliper at the front axle, combined with enlarged brake pads and the newly developed brake booster, has managed to improve

braking and component stability even during continuous use. These two characteristics have also been optimised by the newly developed brake ventilation system with a modified air spoiler at the front and rear axles.

The enhanced dynamics of the Boxster and Boxster S also demand appropriate brake discs. All Boxster brake discs are internally vented and cross-drilled for improved braking in wet conditions. On the Boxster S, the diameter of the front brake discs has been enlarged by 15 mm to 330 mm. At the rear, the diameter is the same as on the Boxster – 299 mm. The brake calipers on the Boxster and Boxster S are black and red respectively.

**Porsche Ceramic Composite Brake (PCCB).**

From the start, Porsche has been synonymous with motorsport. Ever since 1948, when we found our identity on the racetrack, we have taken the experience we have gained and applied it to the road. The optional Porsche Ceramic Composite Brake (PCCB) is a fine example. This brake system has already had to cope with the harshest requirements of motor racing and is fitted in cars that compete in demanding events such as the Porsche Mobil 1 Supercup.

The cross-drilled PCCB ceramic brake discs for the new Boxster have a diameter of 350 mm front and rear for even more formidable braking performance.

The use of six-piston aluminium monobloc fixed brake calipers on the front axle and four-piston units at the rear – all finished in yellow – ensures extremely high brake forces which, crucially, are exceptionally consistent.

PCCB enables shorter braking distances in even the toughest road and race conditions. Excellent fade resistance ensures greater balance when slowing from racetrack speeds.

- 1 Standard brake on the Boxster
- 2 Standard brake on the Boxster S
- 3 Porsche Ceramic Composite Brake (PCCB)

Another key advantage of PCCB is the extremely low weight of the ceramic brake discs, which are approximately 50% lighter than standard discs of similar design and size. As well as enhancing performance and fuel economy, this

represents a major reduction in unsprung and rotating masses. The consequence of this is better road holding and increased comfort, particularly on uneven roads, as well as greater agility and improved handling.

Please note that circuit racing, trackday use and other forms of performance driving can significantly reduce the service life of even the most durable pads and discs. As with conventional high-performance braking systems,

we recommend that all brake components be professionally inspected and replaced where necessary after every track event.

#### **Electric parking brake.**

The electric parking brake, which can be activated and deactivated manually, is released automatically as you pull away with your seat belt fastened. A hill hold function is integrated as standard

for the manual gearbox and for PDK. It assists you in making a comfortable, smooth and roll-free start on an incline. Whenever you come to halt on an incline, this is detected automatically and the braking effect of the electric parking

brake is supplemented by application of the wheel brakes. As long as a gear remains engaged, the brake pressure is maintained at all four wheels. To pull away, simply apply throttle (manual gearbox: apply throttle and release

the clutch pedal). The wheel brakes are released as soon as sufficient starting torque is available and the parking brake is released as the vehicle moves off.

**Porsche Stability Management (PSM).** Enhanced Porsche Stability Management (PSM) is fitted as standard. This system automatically maintains stability even at the limits of dynamic driving performance. Sensors continuously monitor the speed, yaw velocity and lateral

acceleration of the car. Using this information, PSM is able to calculate the actual direction of travel at any given moment. If the car begins to oversteer or understeer, PSM applies selective braking on individual wheels in order to restore stability.

Under acceleration on wet or low-grip road surfaces, PSM improves traction – as well as agility and safety – using the automatic brake differential (ABD) and anti-slip regulation (ASR). Integrated ABS is designed to minimise braking distances.

If you prefer an ever sportier drive, PSM can be switched off. For your safety, however, PSM remains set to intervene if the vehicle is braked and ABS assistance is required. ABS and ABD remain switched on at all times. Also included with PSM are engine drag torque control (EDC),

precharging of the brake system and brake assist. If you suddenly release the accelerator pedal, PSM automatically prepares for your next action: the braking system is precharged so that the brake pads are already in light contact with the brake discs. Maximum braking power is

therefore achieved much sooner. Brake assist detects a panic braking situation and generates the brake pressure required for maximum deceleration.

**Porsche Torque Vectoring (PTV).**

This optional system for increasing dynamic performance and stability varies the distribution of torque to the rear wheels and includes a mechanically locking rear differential.

When the car is driven assertively into a corner, moderate brake pressure is applied to the inside rear wheel. Consequently, a greater amount of drive force is distributed to the outside rear wheel, inducing an additional rotational pulse

(yaw movement) around the vehicle's vertical axis. This results in a direct and sporty steering action as the car enters the corner.

At low and medium vehicle speeds, PTV significantly increases agility and steering precision. At high speeds and when accelerating out of corners, the rear differential lock ensures greater driving stability

on a range of surface conditions, including the wet and snow.

The results are remarkable stability, easier handling and outstanding traction as well as greater agility at every speed with

precise steering and stable load transfer characteristics. What else? As ever, lots of excitement at every twist and turn.

### Sport Chrono Package.

Time is precious and every hundredth of a second counts. The optional Sport Chrono Package makes your driving experience priceless thanks to an even sportier tuning of throttle response and handling characteristics.

The package comprises dynamic gearbox mounts, a performance display, a digital and analogue stopwatch and the SPORT PLUS button. When this is pressed, optional Porsche Active Suspension Management (PASM) switches to 'Sport' mode for harder damping and more direct steering and therefore, even more intensive road holding.

The trigger threshold for PSM is raised. Agility is perceptibly enhanced when braking for corners with PSM, allowing even sportier braking and exit acceleration. For even greater dexterity, PSM can

be set to standby while the car is still in SPORT PLUS mode. For safety, it is set to intervene automatically only when ABS assistance is required.

In conjunction with optional PDK, the Sport Chrono Package comes with two additional functions for a sporty drive that borders on a motorsport experience. The first is 'Launch Control', which is designed to produce a racing start.

The second function is the involving 'motorsport-derived gearshift strategy'. Using this, Porsche Doppelkupplung (PDK) is geared up for the shortest possible shift times and optimum shift points, while torque boosts during gear changes provide the maximum possible acceleration. This involving experience is further enhanced by overrun downshifts and the throttle-blip function for uncompromising driving pleasure.

An additional display in the steering wheel or either the instrument cluster indicates whether the SPORT or SPORT PLUS buttons and, with PDK, Launch Control have been activated. In conjunction with the optional Porsche Communication Management (PCM), a special display enables you to view, store and evaluate lap times or other driving times. It shows the total driving time, lap distance, lap number and lap times recorded so far.

Performance is further intensified by dynamic gearbox mounts. Read on to find out more.

- 1 Sport Chrono display on the PDK steering wheel
- 2 Sport Chrono stopwatch
- 3 SPORT and SPORT PLUS button

1

**Dynamic gearbox mounts.**

Dynamic gearbox mounts are included as part of the optional Sport Chrono Package. They are designed to enhance both performance and comfort.

The electronically controlled system minimises the oscillations and vibrations

of the entire drive train, especially the engine.

The gearbox is bolted to the body by two mounts. Like any mass, it obeys the law of inertia. This means that it will continue moving in a uniformly straight line unless some force causes it to change direction.

Put more simply: when you are driving into a bend, the vehicle will follow your steering but, at first, the mass of the drive train will not. This means that the rear of the vehicle will ultimately be pushed outwards as a result of the drive train's force of inertia.

Dynamic gearbox mounts minimise this effect. Steering angle and both longitudinal and lateral acceleration are constantly recorded by sensors. The stiffness and damping performance of the gearbox mounts adapt to changes in driving style and road surface conditions, which is achieved by use of a fluid with magnetic

properties. This results in greater traction, perceptibly more stable handling under load change conditions and in fast corners and, in conjunction with the 'Launch Control' function for example, extremely fast acceleration.

Using the SPORT or SPORT PLUS button you can switch the dynamic gearbox mounts from 'Normal' to 'Sport' or 'Performance' mode and intensify your driving pleasure.

In conjunction with optional PCM, the G-Force graphic on the TFT screen in the right-hand circular instrument enables you to view the lateral and longitudinal forces as they act on the vehicle.

1 Dynamic gearbox mounts

**The wider view**

**It's the same in the office as it is on the road:  
performance needs a stable concept.**

### **Safety.**

On the road to independence, there is no room for the slightest element of doubt. The active and passive safety concept of the new Boxster models is designed to ensure driving pleasure through peace of mind.

Safety is founded on a precisely engineered chassis and high-performance braking system. It also involves intelligent control systems, such as Porsche Stability Management (PSM), and depends on an innovative body construction designed to keep your roadster stable without diminishing its agility. It is enhanced by

an ingenious lighting concept featuring powerful headlights, by assistance systems that give you the information you need and by an interior that provides reliable protection in the event of an accident.

#### **Engineered body design.**

The bodyshell of the new Boxster models is based on an intelligent lightweight principle involving the composite construction of aluminium and steel. The use of dissimilar but precisely combined components makes it possible to utilise specific material properties exactly

where they are needed. Not only does this provide a high level of safety for the driver, it offers a considerable weight saving compared with the bodyshell of the previous model. This is why the doors of both luggage compartment lids are made from lightweight aluminium.

The crumple zones in the front and rear aprons feature integral light-alloy bumpers, while impact absorbers offer additional safety. For the protection of occupants, energy-absorbing padding is used selectively in important areas within the passenger cell.

- Aluminium
- Super high-strength steel
- Multi-phase steel
- Alloyed steel

1

**Roll-over protection.**

Dual roll-over protection creates survival space in the event of a roll-over or side impact. The front roll-over protection element is made from super and ultra high-strength steels. The rear roll-over bars located behind the seats are a

composite construction of aluminium and steel. They are fully trimmed to blend in and provide an excellent level of safety. The upper seat belt guides are mounted on the roll-over bars for easier fastening.

**Airbags.**

To protect the driver and passenger, the new Boxster models are equipped with full-size airbags, which are inflated in two stages depending on the severity and type of accident (e.g. frontal or offset frontal). In less serious accidents, the

airbags are only partially inflated, thereby minimising discomfort to the occupants.

In addition to the central airbag control unit on the transmission tunnel, a pair of impact sensors is located near the headlights. This allows a crash to be detected

and evaluated far sooner and with considerably greater accuracy.

**Porsche Side Impact Protection System (POSIP).**

Both new Boxster models are equipped as standard with the Porsche Side Impact

2

Protection System (POSIP). It comprises two side airbags on each side. An integral thorax airbag is located in the outer side bolster of each seat, while the door panels each contain an upwards-inflating head airbag. Each thorax airbag has a volume of 10 litres and each head airbag 15 litres,

ensuring excellent protection in the event of a side impact even with the hood open. POSIP additionally includes steel side impact protection elements in the doors.

1 Engineered body design  
2 Airbags and Porsche Side Impact Protection (POSIP)

**Lights.**

Lights will always be an essential safety feature, but we go one step further by using them as part of an extraordinary styling concept.

Clear glass halogen headlights are fitted as standard on the Boxster. The Boxster S is equipped as standard with Bi-Xenon headlights. On both models, LED daytime

running lights and position lights are housed in a separate auxiliary light unit above the outer air intakes. LEDs provide powerful illumination, respond extremely rapidly to driver input, offer a longer service life and have an unmistakable appearance.

LED technology opens up entirely new possibilities for designers. Not only are

LEDs capable of fulfilling all the functions of the imposing taillights and third brake light, they are integral to safety and create a look that is unmistakable, day and night.

**Bi-Xenon headlights including Porsche Dynamic Light System (PDLS).** The optional Porsche Dynamic Light System (PDLS), which comprises Bi-Xenon

headlights with halogen main-beam headlights, a headlight cleaning system and automatic dynamic range control, provides uniform illumination of the road whether dipped or main beam is selected.

The dynamic cornering light function swivels the main headlights towards the inside of a bend based on steering angle and road speed. Put simply, a greater

part of the road ahead is illuminated the moment you enter a bend.

The system also includes a speed-sensitive headlight range control function. With adaptive light systems, it is possible for the maximum range of the dipped beams and their lighting power to be adjusted as a function of the speed of the vehicle. PDLS takes care of this automatically in

two stages. Stage 1 is the basic position, optimised for driving at lower speeds such as in city traffic. Stage 2 is designed for driving at faster speeds, such as when on the motorway. Another function of PDLS is the adverse weather function. Activated when you switch on the rear fog light, it reduces the effect of reflection phenomena in poor visibility conditions.

**Automatic headlight activation.**

In the new Boxster models, automatic headlight activation is available as standard. The system automatically switches between daytime running lights and dipped beam based on ambient lighting conditions.

1 Night design, front  
2 Night design, rear  
3 Taillight  
4 Brake light  
5 Taillight and direction indicator

**You can live for the moment  
and still care about tomorrow.**

### **Environment.**

If we are to continue to enjoy driving pleasure, we need to look after our environment. In other words, we need to take responsibility. In an era of intensifying debate about global climate change and CO<sub>2</sub> emissions, every automotive manufacturer is asking itself what it has to offer in terms of environmental protection. Our answer has long been the same: Intelligent Performance – a combination of high power output and high efficiency.

In recent years Porsche has managed to reduce fuel consumption across all model ranges by a double-digit percentage

compared with the respective previous model, even though performance has been increased in every generation. This is made possible by an efficient drive concept (e.g. direct fuel injection (DFI) and VarioCam Plus), lightweight construction, optimised aerodynamics and low rolling resistance.

The environmental management team at the Porsche Development Centre in Weissach aims to demonstrate a high level of environmental responsibility. Here, technological developments are carried out with environmental protection in mind. The goal is to enhance performance –

but, where possible, not at the expense of the environment. We achieve this goal with Intelligent Performance, as epitomised by the Boxster.

#### **Exhaust emission control.**

Vehicles manufactured by Porsche demonstrate that even high-performance sports cars can achieve moderate fuel consumption and exhaust emission values in their respective category.

This is achieved, on the one hand, through the use of fuel-efficient technologies such as auto start/stop, thermal management, electrical system recuperation, direct fuel

injection, VarioCam Plus and, in conjunction with optional PDK, coasting mode.

On the other hand, newly developed catalytic converters provide efficient emission control. While the stereo Lambda control circuitry controls and monitors each cylinder bank separately. For each exhaust tract, oxygen sensors, together with the engine electronics and injectors, regulate the composition of the exhaust gas, while another Lambda sensor on each cylinder bank monitors pollutant conversion in the respective catalytic converter.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**Fuel economy and recycling.**

Intelligent lightweight construction has been fundamental to the Porsche identity since 1948 for both technical and ecological reasons. This forms the basis for achieving low fuel consumption values in conjunction with outstanding performance.

On the technical side, various components are made with a high proportion of aluminium, magnesium, plastics and super-high-strength sheet steel. The materials used have been selected for their ability to withstand load, yet they are considerably lighter than conventional steel. As a result, the bodyshell of the new Boxster models has a light alloy content of approximately 46%.

On the ecological side, all materials used are meticulously selected. We use only innovative and environmentally friendly components. All synthetic components are easily recyclable and each material is labelled to facilitate its separation for recycling. The reduction in the number of plastic variants helps to ensure more efficient recycling. Recycled plastics are used where they meet our exacting

technical requirements. In short, the new Boxster is around 95% recyclable.

In addition, Porsche uses a high proportion of environmentally friendly water-based paints. For us, environmental protection does not begin at the end of a vehicle's life. It starts at the planning and development stage.

**Fuel.**

Both Boxster models are designed to operate on fuels with an ethanol content of up to 10%. Ethanol has a positive impact on the CO<sub>2</sub> balance since the plants grown for the production of this biofuel also absorb CO<sub>2</sub> from the atmosphere. The release of hydrocarbons from

the fuel system has been minimised thanks to the active carbon filter and the multilayered material from which the fuel tank is made. All fuel lines are made from multilayered plastic, steel or aluminium.

**Servicing.**

Long service intervals offer clear advantages. For you, they reduce costs and save time. For the environment, they assist in the sparing use of consumables and replacement parts. For full details of service intervals, please refer to the separate price list.

For fuel consumption and CO<sub>2</sub> emissions please refer to page 127.

**Free space**

**The most beautiful roof is the sky.**

### **Interior and comfort.**

Ultimately, the feeling of freedom comes from within. The interior of the new Boxster models is purposefully designed as a declaration of independence.

The geometric form of the cockpit follows a clear direction: forwards. The elevated centre console integrates the driver optimally into the vehicle by positioning the gear lever extremely close to the steering wheel to enable fast and sporty gear changes.

The generously proportioned interior is light and offers plenty of space for driver and passenger comfort. The individual controls are characterised by their simplicity and ergonomics for intuitive use.

Fitted as standard, the CDR audio system combines with the optional Sound Package Plus to deliver impressive acoustic performance and has a touch-screen for easy operation. Available as an option, the BOSE® Surround Sound System creates an authentic sound experience with eight amplifier channels, 10 loudspeakers and a total output of 445 watts.

The interior materials are high-quality, and the refined tone is enhanced by a wealth of silver-coloured details. These are found on the dashboard trim strip, the centre console, the door pulls, the glove compartment release lever, the side and centre air vent surrounds and

the model designation plaque on the centre console.

The steering wheel rim and gear lever/selector are sporty and stylish at the same time. The door pull inlays are typically Porsche. Finished in leather, they represent a balanced blend of design and functionality. In the Boxster S, the door armrests and the centre console storage compartment lid are also finished in leather.

For even more sporty elegance, you can request the optional leather package for a stylish leather finish on purposefully selected interior features. As always, a comprehensive leather interior package is also available as an option.

1 Boxster S with natural leather interior in Carrera Red, PDK and other optional equipment available from selected product ranges including Porsche Exclusive

1

2

3

#### Leather package.

You may have thought the interior of your new Boxster couldn't be any more stylish, but the optional leather package enhances its overall appeal by adding a leather finish to the instrument cowl, centre console storage compartment lid, seat centres, side bolsters and headrests, the door armrests and door pulls. With

the leather package, all of these feature a silver-coloured trim strip, which accentuates the dynamic and sweeping design of the interior.

You have a choice between a minimalist single-tone interior, with one of the standard colours Black, Platinum Grey, Luxor Beige or Yachting Blue, and a

two-tone combination of Agate Grey and Pebble Grey<sup>1)</sup> or, exclusively available for the leather package, Agate Grey and Lime Gold. The features in leather (on the seats, only the seat centres) are finished in the contrasting colour.

#### Instruments.

The powerful performance of the new Boxster models may be indescribable, but it can be measured. The three circular instruments give you all the information you need. The rev counter with digital speedometer is positioned in the centre. In the Boxster S, the dial face is aluminium-coloured; in the Boxster, it is finished

in minimalist black. The instrument on the left contains the analogue speedometer with digital trip meter and total distance display.

A new feature of the right-hand circular instrument is the high-resolution 4.6-inch TFT colour screen. It provides you with a continuous stream of data from the

on-board computer, reminds you of your selected communication and audio settings, enables you to customise vehicle settings, delivers various warnings, including alerts from the optional Tyre Pressure Monitoring (TPM) system and in conjunction with the optional PCM, displays the navigation system map.

- 1 Leather package in Agate Grey and Lime Gold
- 2 Boxster instruments
- 3 Boxster S instruments

<sup>1)</sup> Additionally available from 07/2012 at the earliest: two-tone combination of Agate Grey and Amber Orange.

#### Steering wheels.

Where your journey takes you is in your hands. For this reason, all available steering wheels feature a high-grip rim in smooth-finish leather and offer outstanding ergonomics. The reach from the steering wheel to the gear lever is short for sporty and fast gear changes.

In combination with the optional fully electric seats, the steering wheel is also electrically adjustable and for even more convenience, a memory function is included.

#### Sports steering wheel.

The three-spoke sports steering wheel is fitted as standard and offers up to 40 mm of adjustment for both height and reach. The steering wheel rim is upholstered in smooth-finish leather. In conjunction with optional PDK, the steering wheel features two ergonomic switches. One press with

the thumb and PDK shifts up. One pull with the index finger and PDK shifts down. Either the right or left hand can be used.

With the optional Sport Chrono Package and PDK, there is an additional display above the airbag module. It tells you whether the SPORT, SPORT PLUS and Launch Control functions are activated.

The optional multifunction steering wheel provides extra operating comfort with four function buttons and two thumb-wheels for convenient operation of many audio, telephone and navigation functions.

#### SportDesign steering wheel.

Visually, the optional SportDesign steering wheel is distinguished by its stylish twin-spoke design. It's in safe hands, even on the sportiest of drives.

In conjunction with PDK, the steering wheel features two gearshift paddles. Made from a strong alloy, they are ergonomically located behind the right and left steering wheel spokes. Pull the right-hand paddle and PDK shifts up. Pull the left-hand paddle and PDK shifts down.

When combined with the optional Sport Chrono Package and PDK, the steering wheel has an additional display in the left- and right-hand spokes to indicate whether the SPORT, SPORT PLUS and Launch Control functions are activated.

#### Steering wheel heating.

For extra comfort on those cold days, a heating function is available as an option for the sports steering wheel and the multifunction steering wheel. The heating is activated by a separate control button on the steering wheel and the rim is warmed to a pleasant temperature. Cold

weather should never be a reason to prevent you from enjoying your open-top driving experience.

- 1 SportDesign steering wheel
- 2 Sports steering wheel
- 3 Multifunction steering wheel
- 4 SportDesign steering wheel with gearshift paddles in conjunction with PDK

**Take a seat.**  
**The seat you've always promised yourself.**

**Seating.**

**Sports seats.**

The standard Sports seats are comfortable and provide support even during performance driving. The seat centres are finished in Alcantara, a material renowned in motorsport for its durability. The seats are equipped as standard with electric backrest adjustment and manual height and fore/aft adjustment.

**Sports seats Plus.**

The optional Sports seats Plus are upholstered in smooth-finish leather. The side bolsters of the seat squab and backrest are more prominently defined and have a firmer, more sporty padding for even better lateral support. The backrest shell up to the headrest has a Silver Grey

Metallic paint finish. To help you find the optimum posture, the seats feature electric backrest adjustment and manual height and fore/aft adjustment.

**Fully electric Sports seats.**

If you don't want to sacrifice sportiness for comfort, the optional fully electric Sports seats offer fully electric adjustment of seat height, backrest angle, squab angle and squab depth. Also electrically operated are the fore/aft adjustment, four-way lumbar support and even the steering column. The memory function supports the exterior mirrors and all seat positions on the driver's side as well as settings for the steering wheel, lights, wipers, two-zone automatic climate control

(optional), door locks, PCM (optional) and instrument cluster.

**Adaptive Sports seats Plus.**

The optional adaptive Sports seats Plus are the ideal combination of sport and comfort. Offering 18-way fully electric adjustment, the seats can be optimally adapted to meet your needs in terms of seat height, squab and backrest angle, squab length, fore/aft adjustment and four-way lumbar support. Steering column adjustment is also electronically supported.

In addition, the side bolsters on the seat squab and backrest are independently adjustable for added comfort on winding

roads. Also included is the personal memory for all seat positions (apart from the side bolsters) on the driver's side as well as the positions of the steering wheel and exterior mirrors. The memory function additionally supports settings for the lights, wipers, two-zone automatic climate control (optional), door locks, PCM (optional) and instrument cluster.

**Seat heating and ventilation.**

Seat heating is available as an option for all seats. Seats are heated in the squab, backrest and side bolsters.

On request, we can equip all our seats with seat ventilation (only in conjunction with seat heating). A slipstream effect is

produced by active ventilation of the perforated seat centre and backrest and by passive aeration at the side bolsters. This evaporates perspiration moisture and therefore makes for a dry and pleasant seating environment, even in hot weather.

**Child seats.**

A Boxster should be enjoyed by passengers of all ages. ISOFIX child seat preparation is available as an option and includes a deactivation function for the passenger airbag.

- 1 Standard Sports seat
- 2 Sports seat Plus
- 3 Fully electric Sports seat
- 4 Adaptive Sports seat Plus with optional electric seat heating and seat ventilation

1

2

3

4

**Wave goodbye to everyday life.  
But embrace everyday practicality.**

### **Additional comfort and convenience features.**

#### **Air conditioning system.**

An air conditioning system with integrated active carbon filter is fitted as standard. The filter traps particles, pollen and odours. The ventilation pattern is wide and the air conditioning is quiet and effective.

#### **Two-zone automatic climate control.**

Two-zone automatic climate control is available as an option. It provides an enhanced ventilation effect and has separate temperature controls for the driver and front passenger. The available air conditioning modes are gentle, normal and strong.

The automatic air-recirculation function permanently monitors air quality, reduces

humidity and switches from fresh to recirculated air when required. Another function makes it possible to use the residual heat of the engine to heat the passenger compartment for up to 20 minutes with the ignition switched off.

#### **Storage compartments.**

Ingenious storage solutions create plenty of space: the lockable glove compartment, the compartment with a power socket under the armrest in the rear centre console and the uncovered compartment to the front of it. In conjunction with the smoking package, the uncovered compartment makes way for an ashtray with a lid. Other storage features include two compartments in each door, a net in

the passenger footwell, clothes hooks on the seat backrests and two practical cupholders above the glove compartment.

#### **Light design package.**

The optional light design package comprises dimmable LEDs in the door panels, overhead console and footwells. LED lighting in the luggage compartments is additionally included.

#### **'Welcome Home' lighting.**

The 'Welcome Home' lighting function automatically switches on the LED daytime running lights for a user-defined period whenever the vehicle is opened or closed using the key remote.

#### **Water-repellent side windows.**

The surfaces of the side windows are treated with a water-repellent coating so that not only water but also dirt runs away more easily, thereby providing clearer visibility even in poor weather.

- 1 Door storage compartments
- 2 Cupholder
- 3 Air conditioning system
- 4 Two-zone automatic climate control
- 5 Uncovered centre console storage compartment

**Exterior mirrors and rear-view mirror.**

The new Boxster models are equipped as standard with electrically adjustable and heated exterior mirrors.

Available as an option, electrically folding exterior mirrors with door courtesy lighting on both sides of the vehicle make it easier to find your way in the dark.

An auto-dimming function for the exterior mirrors and rear-view mirror with an integrated rain sensor for the windscreen wipers, is available as an option.

**ParkAssist.**

Optional ParkAssist is activated the moment you select reverse gear. An audible signal gives a warning if you reverse too close to an obstacle.

An enhanced version of ParkAssist also provides monitoring of the area to the

front of the vehicle. Ultrasonic sensors are neatly integrated into the front and rear aprons. The audible alert is supplemented by a visual warning in the central display of the CDR audio system or optional PCM, which shows a graphical representation of the vehicle from overhead.

**HomeLink®**

**(programmable garage door opener).**

The optional programmable garage door opener is integrated into the overhead console and remotely controls up to three different garage doors, gates, home lighting and/or alarm systems.

**Anti-theft protection.**

Both new Boxster models are equipped as standard with an immobiliser with in-key transponder and an alarm system with contact-sensitive exterior protection.

**Preparation Vehicle Tracking System (PVTs).**

This standard preparation enables future installation of the Porsche Vehicle Tracking System (PVTs) available from Porsche Tequipment. The system makes it possible to locate a stolen vehicle across most of the countries of Europe. The preparation package includes a special wiring loom and a tilt sensor for the alarm system.

**Two luggage compartments.**

The two luggage compartments are further proof that the Boxster harmoniously combines the spirit of sport with everyday practicality like never before. The front and rear compartments have a capacity of 150 and 130 litres respectively, regardless of whether the hood is up or down. The interior surfaces are carpet-lined and the lids are made from aluminium. The two service openings in the rear luggage compartment provide

convenient access to the coolant and engine oil filler caps.

The separate Porsche Design Driver's Selection catalogue contains a selection of matching luggage accessories.

1-3 Loading options with luggage items from the Porsche Design Driver's Selection (items of luggage from the PTS AluFrame and PTS Soft Top series)

**Fully electric hood.**

Think a sense of freedom isn't available at the push of a button? Think again. The new Boxster models are equipped as standard with a fully electric hood. With the engine running, the opening and closing processes are completed in

around nine seconds. The hood is operable up to a speed of approx. 30 mph (50 km/h). When the vehicle is stationary, the hood can even be operated remotely using the vehicle key.

The newly styled hood design blends in elegantly with the contouring of the Boxster models. As a key design feature, it accentuates the new, stretched side view of the vehicle. The hood flows backwards and sweeps into the body. The especially powerful silhouette promises

excellent dynamic performance and delivers impressive aerodynamics.

The hood stows away compactly above the engine compartment without reducing the luggage compartment volume. The hood motor runs

exceptionally quietly and the modern soundproofing fabric is robust and improves interior acoustics. The large rear screen is made from glass and is electrically heated and scratch-resistant, so you can continue to enjoy your freedom whatever the weather.

**Wind deflector.**

A wind deflector is available as an option. It reduces air turbulence in the cabin and fits easily to the roll-over bar.

**We've shown you what rock 'n' roll looks like.  
Now you want to know how it sounds.**

## Audio and communication.

### CDR audio system.

The CDR audio system is an ideal complement to the resonant engine sound of the new Boxster models. It features a 7-inch colour touchscreen, giving you quick and easy access to the most important functions and menus.

The integrated CD radio features an FM dual tuner and RDS diversity, 30 memory presets, dynamic autostore and speed-sensitive volume control. The system also includes a sound system with four loudspeakers and a total output of 2 x 25 watts.

For an even more intense listening experience, the CDR audio system can be combined with the Sound Package Plus (p. 99) or the BOSE® Surround Sound System (p. 100) on request.

### Porsche Communication Management (PCM) including navigation module.

PCM is your central information and communication system. It is powerful and multifunctional, yet easy to operate.

The focal point is the intuitive 7-inch high-resolution touchscreen. Almost all

functions can be controlled with just your fingertips, although conventional rotary pushbutton controls are still provided. Radio functions include up to 42 memory presets, dynamic autostore and the FM dual tuner with RDS diversity, which continuously scans in the background for the best signal.

The CD/DVD drive plays CDs and audio DVDs and is MP3-compatible. Audio playback of video DVDs is also supported. A six-disc CD/DVD auto-changer integrated into PCM is available as an option.

A navigation module with high-speed hard drive is included with PCM. For route guidance, it is possible to select between a 2D display and a 3D perspective. In some regions, even land and buildings can be displayed in 3D. Split screen mode enables you to view two functions at once, such as the current navigation map and a list of symbols that represent the next navigation instruction.

1, 3 Porsche Communication Management (PCM)  
2 CDR audio system

**Electronic logbook for PCM.**

An electronic logbook is available for PCM as an option. It enables automatic logging for every journey of mileage, route distance, date, time, starting location and destination. After you have downloaded your logbooks from the PCM via the USB or Bluetooth® interface, you can evaluate the data on your home PC

using the software supplied. The software fulfils all statutory requirements for automatic logbooks as specified by the German revenue authorities.

**TV tuner for PCM.**

The optional TV tuner is capable of receiving unencrypted analogue and digital television broadcasts (DVB-T) to

provide entertainment between journeys. For your safety, the TV picture is switched off while the car is in motion.

**Voice control system for PCM.**

To get what you want, you like to get straight to the point. Almost all of the functions of PCM can be controlled using the optional voice control system with

word-by-word input. The menu item is read aloud exactly as it is displayed on the screen and the voice control system recognises commands or sequences of numbers, whoever the speaker. It then gives an audible acknowledgement and carries out the functions you request. There is no need to 'train' the system.

**Telephone module for PCM.\***

The optional quadband GSM telephone module offers convenience and excellent reception. By inserting a SIM card directly into the PCM's integral SIM card reader, calls can be made using the hands-free facility. For even more convenience, the Bluetooth® capability of a mobile phone can be used to make calls via the

SIM Access Profile (SAP). Once automatic pairing is complete, the mobile phone's aerial is switched off to conserve battery charge and the phone operates via the car aerial. Depending on the mobile phone model, this gives access not only to the numbers on the SIM card, but also to the phone's internal memory. Depending on the phone, it can also be

controlled using PCM, the optional multifunction steering wheel or the optional voice control system, without it ever leaving your pocket.

\* Notes: see page 116.

- 1 Electronic logbook for PCM
- 2 TV tuner for PCM
- 3, 4 Voice control system for PCM
- 5 Telephone module for PCM
- 6 Cordless handset for telephone module

1

In addition, the telephone module enables you to establish a Bluetooth® link with those mobile phones that only support the Handsfree Profile (HFP). In this case, the GSM connection is always established through the aerial of the mobile phone. PCM acts as a hands-free system and you can leave the mobile phone tucked away.

On request, a cordless handset for the telephone module is also available. Stored in the centre console, it features a display and keypad. However, the handset cannot be used for Bluetooth® links established using the Handsfree Profile (HFP).

#### **Mobile phone preparation for PCM and CDR.\***

To enable a Bluetooth® connection for those mobile phones that only support the Handsfree Profile (HFP), an optional mobile phone preparation is available. With HFP, the CDR audio system or PCM acts as a hands-free system. The CDR audio system and PCM are able to control all the basic functions of the mobile phone. The GSM connection is established through the aerial of the mobile phone.

#### **Universal audio interface for PCM and CDR.**

With this feature, the CDR audio system is supplemented by an AUX interface (e.g. for connecting a compatible MP3 player) installed in the glove compartment. In conjunction with optional PCM, a USB port is included to enable you to connect your iPod® or a USB stick. Whichever device is connected, it can be controlled conveniently and safely using PCM, the optional multifunction steering wheel or the optional voice control system. Through the USB port, it is also possible to download data from the performance display of the optional Sport Chrono Package as well as data from the optional electronic logbook.

#### **CD or CD/DVD autochanger.**

An integrated six-disc CD autochanger is available for the CDR audio system on request, while an integrated six-disc CD/DVD autochanger is available for optional PCM. Both support the playback of tracks in MP3 format.

#### **Sound Package Plus for PCM and CDR.**

For sophisticated ears: the optionally available Sound Package Plus.

With a total output of 185 watts, seven loudspeakers combine to create the perfect interior sound experience. Audio settings can be customised using the CDR audio system or optional Porsche Communication Management (PCM).

\* Notes: see page 116.

**BOSE® Surround Sound System.**

The optional BOSE® Surround Sound System really strikes a chord.

Developed specifically for Porsche and optimally tuned for the interior of the new Boxster models, it can be combined with optional Porsche Communication Management (PCM) or the CDR audio system.

This high-end audio system comprises eight amplifier channels with a total output of 445 watts. Its 10 loudspeakers, including an active subwoofer concealed behind the dashboard, deliver a balanced acoustic pattern.

In combination with optional Porsche Communication Management (PCM), the BOSE® Surround Sound System enables audio playback of DVDs and is thus able to make full use of the impressive sound spectrum of 5.1 digital recordings. Of course, you can still play other audio sources, such as CDs and MP3s, in stereo or, at the push of a button, in one of the virtual surround modes generated by BOSE® Centerpoint® 2.

The BOSE®-patented AudioPilot® noise compensation technology uses a microphone to continuously measure the ambient noise inside the vehicle and

adapts music playback instantly and automatically so that a consistent sound is maintained – whatever the driving conditions.

The result is a balanced, faithfully reproduced sound and a captivating 360° acoustic experience.

## Stereotype or model character?

### Personalisation.

The new Boxster models bring a completely new, edgy character to the roadster concept. Of course, you add the finishing design touches to such a personal car.

The following pages feature all of the available products. For your convenience, each one has been arranged into the appropriate category. For more information on the options featured in this catalogue, please refer to the separate price list.

The extensive colour palette, for example, gives you the opportunity to make your Boxster even more personal. You have a choice of four solid colours,

seven metallic colours, three special colours, four hood colours and ten interior colours. With the leather package, the range includes predefined colour combinations of Agate Grey and Pebble Grey or Agate Grey and Lime Gold. The leather interior package additionally includes a two-tone combination of Agate Grey and Pebble Grey.

Of course, you can choose to have your Boxster finished in virtually any other colour of your choice. For further information, please refer to the Porsche Exclusive Boxster catalogue. It offers an even more comprehensive selection of personalisation options for your Boxster

and a way to turn something special into something unique.

With our Porsche Tequipment range of accessories, you can always customise your Porsche at a later time. Please consult your Porsche Centre for more details.

Using the Porsche Car Configurator at [www.porsche.com](http://www.porsche.com), you can transform your ideas into reality. Here, you can design your very own Boxster model from the ground up. The choice of colour or additional equipment, as always, is up to you.

<sup>1)</sup> May be incompatible with some copy-protected audio CDs (CDR) or audio CDs/DVDs (PCM).

<sup>2)</sup> Mobile phone preparation or telephone module in HFP mode: the use of a mobile phone inside a car may cause an increase in the interior electromagnetic field strength and, accordingly, in the electromagnetic radiation to which passengers are exposed. If a cradle is used to mount the mobile phone, the field strength in the passenger compartment can be reduced because the phone can be connected up to the external aerial (feature depends on how specific mobile phones connect to the cradle). For information about the availability of a cradle for your mobile phone, please contact your Porsche Centre. The use of the telephone module for PCM via Bluetooth® SAP connection or with inserted SIM card prevents exposure to electromagnetic radiation as only the car's external aerial is ever used. For information on compatible mobile phones, please visit [www.porsche.com](http://www.porsche.com) or contact your Porsche Centre.

<sup>3)</sup> For information on compatibility with iPod® and iPhone® models, please contact your Porsche Centre.

<sup>4)</sup> For receiving digital TV signals (DVB-T) (where available).

The vehicles illustrated in the chapter on personalisation may include additional options not featured in this catalogue. For information on these options, please consult your Porsche Centre. For more information on the options featured in this catalogue, please refer to the separate price list.

## Porsche Exclusive

**Creative freedom is another form of exclusivity.**

With the range of options featured in this catalogue, you can make your Porsche even more special. Introducing Porsche Exclusive. Have your vehicle individually

and exclusively tailored to your wishes even before it leaves the factory. Aesthetically and technically, inside and outside, using fine materials and with customary Porsche quality.

Our overriding principle? That your car is uniquely handcrafted to your taste. You will find a wide range of design options in the separate Porsche Exclusive Boxster catalogue.

Either your Porsche Centre or the customer centre in Zuffenhausen (phone +49 (0) 711-25977) will be happy to answer any questions about Porsche Exclusive that you may have. Please note that delivery times may be extended for certain Porsche Exclusive equipment.

## Porsche Car Configurator

**Independence begins with an idea.**

Taste, personality and style. You decide how to refine the new Boxster to your personal preference. With the Porsche Car Configurator, you can see the result instantly on your computer. Just five steps are all it takes to create the Porsche of your dreams.

To access the Porsche Car Configurator, please visit [www.porsche.com](http://www.porsche.com).

## Porsche Driving Experience

### Porsche Sport Driving School.

At Porsche, we are working not only on the evolution of the sports car, but also on the development of the drivers. Safe driving on the road may be second nature, but what about mastering control of a sports car at the limits of sporty performance? We will help you to perfect your driving safety as well as your advanced skills and techniques step by step.

Under the supervision of our experienced Porsche instructors in your own car or in

one provided by the Porsche Sport Driving School, you can refine your ability on-road or off-road, on international racetracks or on ice or snow. We will be by your side from the start and, if it is your aim, we will accompany you through every training level on the way to obtaining your motorsport licence.

To find out more, please go to [www.porsche.com/sportdrivingschool](http://www.porsche.com/sportdrivingschool)

### Porsche Travel Club.

With the Porsche Travel Club, your holiday begins from the very first second – the moment you step inside the vehicle. Leave everyday life behind and join us in one of the most beautiful regions in the world. We look forward to you being our guest. Whether you are here for several hours or several days, your constant companion will be a Porsche. A unique experience awaits and includes an exclusive hospitality package. You will stay in first-class hotels and dine in the best

restaurants your chosen route has to offer. The Porsche Travel Club gives you access to the very thing that words cannot describe: the authentic driving feel of a Porsche.

To find out more, please go to [www.porsche.com/travelclub](http://www.porsche.com/travelclub)

## Factory collection

The first time that you drive your new Porsche will be a truly special moment. Nevertheless, you can make it even more special with Porsche factory collection. Come and collect your Porsche in Stuttgart-Zuffenhausen or Leipzig and be the one to take it to its rightful place: on the road.

Before this, we invite you behind the scenes of the Porsche production process. As part of a guided factory tour, you will see how much passion

and precision goes into everything we do. You can then take time to reflect on your experience over a leisurely lunch and look forward to the high point of the day: taking delivery of your Porsche. Our specialists will take their time to explain everything about your new car in as much detail as you wish.

That leaves you with just one more thing to decide: from which factory to collect your Porsche? Stuttgart-Zuffenhausen is steeped in tradition and history. Here, you

can visit the Porsche Museum to experience and learn about every aspect of the Porsche marque, with legendary models from a sports car history spanning over 60 years.

Or, if you would prefer your factory collection to be a little more on the sporty side, visit our production location in Leipzig. Your first driving experience will be a test drive in a Porsche model identical to the one you purchased and under the expert supervision of one of

our instructors. Hone your skills either on-road on the FIA-certified test circuit or on our very own off-road track in a Porsche off-road vehicle.

If you do opt for the factory collection, please contact your Porsche Centre to arrange a collection date. We will be happy to assist in the planning of your trip. You will also be given information on the formalities, legal or otherwise, to be completed before you can take delivery.

## Panorama

### Porsche Centres

Your Porsche Centre can assist you with every aspect of purchasing and owning your Porsche. You will also find a wide range of products and services, including genuine Porsche parts and accessories.

### Porsche Assistance

Enjoy peace of mind with our exclusive breakdown and accident recovery service. Membership is free when you buy a new Porsche.

### Porsche Financial Services

Our range of financial services is innovative and specially tailored to the needs of Porsche owners. Products range from attractive finance and leasing options to vehicle insurance and the Porsche Card.

### Porsche Exclusive

Realise your vision of the perfect Porsche with our factory customisation programme. From styling enhancements to performance upgrades, all modifications are uniquely handcrafted for your Porsche.

### Porsche Tequipment

Personalise your Porsche at any time after purchase with the Tequipment range of approved accessories. Perfectly matched to your vehicle and covered in full by your original vehicle warranty.

### Porsche Design Driver's Selection

With products ranging from fashion and accessories to tailored luggage, this unique collection combines quality and style with everyday practicality.

### Porsche Online

For all the latest news and information from Porsche, go to [www.porsche.com](http://www.porsche.com).

### Porsche Approved Programme

So that our vehicles remain reliable and retain their value, we guarantee that all our Porsche Approved cars meet the most stringent Porsche quality standards, anywhere in the world. Every car is backed by the Porsche Approved warranty.

### Porsche Classic

Your specialist source for genuine Porsche parts and technical documentation as well as servicing, repair and restoration for all types of classic Porsche. Find out more at [www.porsche.com/classic](http://www.porsche.com/classic).

### “Christophorus”

Our bi-monthly magazine for Porsche owners has news, interviews and a wide variety of features from throughout the world of Porsche.

### Porsche Driving Experience

#### 1. Porsche Travel Club

Exclusive driving holidays and incentive ideas combining luxury and adventure, worldwide. To find out more, call +49 (0)711 911-23360. E-mail: [info@porschetravelclub.de](mailto:info@porschetravelclub.de)

#### 2. Porsche Sport Driving School

Develop your skill and explore your Porsche with the Porsche Sport Driving School. To learn about events at some of the world's most famous racing venues, call +49 (0)711 911-23364. E-mail: [sportdrivingschool@porsche.de](mailto:sportdrivingschool@porsche.de)

### Porsche Clubs

Since the first Porsche Club was founded in 1952, their number has grown to 620 with a total of 180,000 members worldwide. To find out more, call +49 (0)711 911-23252 or go to [www.porsche.com](http://www.porsche.com).

### Porsche Museum

More than 80 vehicles are waiting to take you back through every stage of Porsche history. They include such icons as the 356, 911 and 917 and many other special exhibits presented in an atmosphere you can't experience anywhere else.

You can obtain the latest brochures for Porsche Exclusive, Porsche Tequipment, Porsche Design Driver's Selection and Porsche Driving Experience from your Porsche Centre.

## Spirit, declared.

To us, independence is above all a feeling, but it is also a guiding principle. It is the principle by which we can think for ourselves, explore our own direction and live our own lives.

How better to do this than in a roadster, a concept in which freedom of spirit has

always been the core idea? Symbols of freedom may have changed over the years, but freedom itself is instantly perceptible. You can see it, hear it and feel it – from one twist and turn to the next.

The new Boxster.  
Spirit, declared.
